

# G6

## Dual Function Machine - Grit Polisher or Turbo Sifter

The G6 is the ideal machine to separate two products in the milling process where a large capacity is required. This unique machine consists of a conical sieve and an outlet screw feeder. The G6 can be used in milling operations as a grit polisher or as a turbo sifter.

# Typical product application

## Performance of main product

Throughput rate of maize 6000kg

Model	SIF TR1 000 006
Number of Motors	1
Motor Power	3kW
Number of Screens	1
Screen Surface	0.8m <sup>2</sup>
Weight	+/- 280kg
Crating Dimensions (mm)	l x w x h 2000 x 700 x 900

## Highlights

- Low power consumption
- High throughput capacity
- Interchangeable screen sizes for various applications
- Capable of screening high fat content products
- Compact installation
- Minimum maintenance required
